CROSS-WORD PUZZLE SOLUTION

Our January puzzle "went over big." Although only a few *correct* solutions were received, a great number of attempts were faulty only in one respect. The commonest error was the use of *serrate* in place of *striate*, the definition of the latter word being "to mark with parallel scratches."

A one year subscription was awarded to the following puzzle fiends Charles P. Smith, R. R. Davidson, Clyde E. Schumaker and William S. Dun.

HOW "CATALOGUE STUDIES" CAN HELP YOU

We wish to call the technical student's attention to Volume 14 of "Catalogue Studies"—available in your college library or engineering department—in which are bound some of the Hercules Powder Company's contributions to the technology of blasting.

This contains the following publications: Eliminating Waste in Blasting, Hercules Explosives and Blasting Supplies, Scientific Quarry Blasting, Shot-firing by Electricity, Flotation: a Brief Survey, Land Development with Hercules Dynamite, Land Clearing and Wood Utilization by Distillation, Hercules Galvanometers and Rheostats, Increasing Lump Coal Production by Cushioned Blasting, Hercules Flotation Oils, Hercoblasting, Dynamite: the New Aladdin's Lamp.

Each of these booklets provides clearly-presented, practical information on how to use explosives effectively and economically. These publications have been of great help to many men in the field and are carefully preserved by them for ready reference. By becoming acquainted with this material, you will acquire information that may be of great value to you in your profession and which many engineers do not get until faced with the actual need. Should you wish separate copies of any of the booklets listed above, write to the Hercules Powder Company, 941 King Street, Wilmington, Delaware.
